

How to create your user account in the WebStore

It is not necessary to create an account to browse through the store, but everyone who wishes to purchase something must have a user account.

1. You can set up an account for yourself and then make purchases. To do this, click “Set up” on the Login section.
2. On the next page, enter your Billing Information and create a username and password. Click on “Create Account.”
3. You will receive a message saying your account was added successfully. That’s it!
